

Partner Liberia 2018 Annual Report

Partner Liberia promotes sustainable healthcare solutions in Liberia, West Africa. We do this through training and educating respiratory therapists in Liberia to address respiratory issues, which are the leading cause of death in the country. We also provide renewable energy to health clinics, offering electricity in rural clinics that would not otherwise have it.

Respiratory Healthcare Education

With the support of our donors, **Partner Liberia** continues to operate the Liberian Respiratory Health Care Institute (LRHI). The first of its kind in West Africa, LRHI is a respiratory therapy college that provides training and job placement to Liberians wanting to enter the healthcare field.

Solar Power Projects

Partner Liberia continues to support installation and maintenance of solar power systems with our partners throughout Liberia, including providing solar power to clinics, hospitals, and orphanages.

Partner Liberia is thankful for our partners:

- ◇ Ministry of Health and Social Welfare, Republic of Liberia ◇
- ◇ Brother's Brother Foundation ◇
- ◇ Pickering Energy Solutions ◇
